

ION8

OUR PRODUCT, YOUR LOGO

reddot award
winner

Engrave your bottle with your logo to create something unique either for your own use, for gifting or for selling.

Bottles for your own use

- Reduce your carbon footprint, cut out the disposables.
- Reward your team.
- Showcase your brand.
- Save waste, save plastics, save money.

Gifts for Clients

- Give something really useful - nobody needs another calendar or pen.
- Take pride, show you care.
- Bundling & promotion.
- Save waste, kick start a conversation, build relationships.

Brands, Places & Events

- Your store, hotel, school, charity, club, association, product brand or sports team.
- Location & holiday souvenirs.
- Conferences, concerts, product launches, events, birthdays, celebrations.
- Save waste, make money.

ION8

ION8 is a specialist hydration brand. We are experts in reusable water bottles and our high quality products have won numerous design awards. All of our bottles are design and patent protected.

The ION8 brand is UK based and was formed in 2016. From small beginnings, the brand has now grown significantly and is now Europe's fastest growing hydration brand.

Leak Proof

When closed, the spout and vent are completely sealed.

Safety Lock

For peace of mind when throwing into a bag.

Easy Open

Opens hands free with just one finger.

Smooth Flow

Vented, smooth liquid flow for rapid, spill-free hydration.

Carry Safely

Integrated carry handles make it easy to take it anywhere or clip onto a carabiner.

Clean

Spout always safely covered & contamination free. No porous surfaces or straps.

Food Safe

BPA Free, food safe, odour resistant, keeps drinks fresh.

Dishwasher Safe

Crevice free design, easy to clean, fresh & odour resistant. Top rack dishwasher safe.

Reusable, Sustainable & Carbon Neutral

Ion8 are committed to a 100% Carbon Neutral strategy and a meaningful contribution to the reduction of avoidable waste.

We achieve this with a 3 point strategy

- **Design** Design products people love to use.
- **Reduce** Minimize our carbon footprint.
- **Offset** Support initiatives to offset the footprint.

We seek out ways to minimize our carbon footprint. We do this by finding the optimal materials, then innovating so as to reduce the usage and waste of materials, packaging & energy.

Recyclon

Recyclon is a transparent bio-based plastic. Using fossil fuels releases the carbon stored inside, causing global warming. Recyclon is made with plant biomass materials, and is totally carbon neutral. Furthermore, Recyclon has a lower melting point. This reduces both processing temperature and cycle time, dramatically reducing energy use.

Packaging

We actively minimize our packaging. No boxes, no tubes, no plastic tags. Further, we use recycled materials for over 99% of our packaging.

Solvent Free Powder Paint

We use only powder paints, which are totally solvent free. Powder paints are also highly durable, so bottles last for much longer.
