

APPAREL WORKBOOK
FALL / WINTER

WE EXIST TO CONNECT PEOPLE WITH NATURE

Halti is for active people who appreciate the outdoors. Nordic nature teaches and inspires us to create clothing, shoes and gear that withstand time and wear. With over 45 years of experience, we design products for all seasons, for the most demanding conditions, and for those who appreciate perfect functionality and sustainability. We exist to inspire everyone to find their own way to enjoy outdoors.

We're deeply committed to the well-being of our communities and the planet. Our "Think Ahead" sustainability program drives our practices. We're a Bluesign® system partner, ensuring compliance with stringent substance standards. Every Halti factory undergoes Amfori BSCI audits, guaranteeing fair working conditions. We prioritize renewable and recycled materials, modern dyeing methods, and use state-of-the-art 3D software to reduce waste and emissions. Our own operations in Finland received the WWF Green Office certificate and we are committed to the global Science Based Targets initiative to reduce our emissions throughout our entire value chain.

We are proud to introduce our AW2425 Apparel Collection, featuring Outdoor, Insulations, Midlayers, Kallio® Urban Techwear, Active Sport, Cross Country, Skiwear, Ski Touring, Baselayers, and Accessories. Explore these new styles for your next outdoor adventure. Halti has you covered.

Breathe the outdoors,
CEO Aki Kuusilehto

Halti's sustainable development programme

Our generation has always taken our clean nature as a given. We at Halti have set our sights far into the future and we are doing all we can so that later generations can enjoy it like we have. All of Halti's operations are based on respecting the environment and other people. After all, our products are designed for outdoor life and sports.

With Think Ahead, our sustainable development programme, we take responsibility for our social, environmental and financial footprints. We have much work ahead of us, but we are continuously trying to do better - in every phase of the product lifecycle. We think ahead!

Environmental responsibility

- We design and manufacture durable and timeless products with the design philosophy of considering the environmental effects of the whole product life cycle.
- We are a bluesign® system partner and demand that both our new and existing bluesign® subcontractors comply with the detailed bluesign® restricted substance list.
- Our products are made in compliance with the REACH regulations, which protect people and the environment from harmful chemicals.
- We only accept RDS down to avoid do the unethical treatment of animals such as forced feeding, the plucking of living birds, or mulesing method in wool production. We do not use real fur in our products.
- We use 3D design program, which optimizes the design process.
- Our DWR is PFAS-Free.
- Our Head Office follows WWF Green Office environmental management system to which WWF Finland has awarded the Green Office label on 25.1.2022.
- We have launched Halti 2nd Round- concept with Repair and Resale and Donate- to promote and support our clients with circularity.

Corporate social responsibility

- Our products are made in socially and ethically acceptable conditions.
- Since 2010, our procurement operations have been guided by our membership of the Business Social Compliance Initiative (amfori BSCI), which guarantees fair working conditions and safeguards the rights of our subcontractors' workers. 100% of our clothing and shoe factories are BSCI-audited.
- As a member of amfori BSCI, we actively exert our influence to promote economically, socially and ecologically responsible operations and maintain our awareness of these issues.
- As a member of the EOG and SOG, we take part in sustainable development projects in our industry and obtain first-hand information about matters relevant to our sector.

Our future aim

Since 2010, sustainable development has been an important element of Halti's business strategy. A lot has been done already, but we are continuously improving our activities and will continue to aim high. These are our concrete targets in the near future:

- We have made a Science Based Targets commitment and our target is to reduce our emissions by 50% by 2030 and reach Net Zero by 2050
- We continue to increase the use of recycled materials in our products.
- We continue to increase the use of bluesign materials in our products.
- We aim to use only recycled/recyclable or renewable packaging materials.

Huomioi että neon värit eivät tulostu oikean sävyisinä. Neon värit on merkitty N-kirjaimella. On myös huomioitava, että neon-väriset vaatteet voivat haalistua sekä värjätä muita vaaleampia materiaaleja. M-kirjain tuotteen värikoodin lopussa tarkoittaa, että materiaali on meleerattu. Untuvavaatteissa untuvat voivat kuulua läpi pääli- ja vuorikankaista.

Note that neon colours do not appear as bright as they should in the printout. Neon colours are marked with letter N. It should also be noted that neon-colours in clothing may fade and stain other lighter materials as well. The letter M at the end of the product's colour code means that the material is melange. In down clothing, the down may be visible through outer and lining fabrics.

SUSTAINABLE WARMTH IN THE COLDEST HUMID CONDITIONS

Technical and ecological paddings which are produced by high standards using recycled materials. Paddings are extremely light weight and they can maintain high heat ratio even when wet. As padding is water repellent and extremely breathable, it is suitable for really high activity, in cold and wet circumstances.

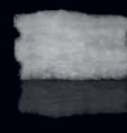

microtherm[®]
THERMOFILL

This super soft down like filling contains small fiber clusters that are blown into filling. This way fibers creates uneven structure that can capsule a lot of air inside and makes it very warm and lightweight.

microtherm[®]
ARCTY

With extra fine and soft fibers this filling creates lofty feeling and super warm result. Many layers of fine fibers can capsule air very effectively and thus can be used in the coldest conditions.

microtherm[®]
DYNAMIC

Enough warmth and technical functionality is key to this dynamic filling. Overlapping fibers creates stretchable structure that capsules air even with slim structure. Works perfectly with stretchable outshells.

OUTDOOR

The Halti Outdoor collection resides at the core of our company’s DNA. The Nordic nature that surrounds us serves as a constant source of inspiration and challenge, driving us to craft high-performance apparel capable of withstanding all weather conditions. In our AW2425 collection, we introduce a new concept known as ‘Weather-X’ to the market. Weather-X features a range of waterproof, windproof, and breathable DrymaxX® products, tested to embrace and conquer all of nature’s elements. Furthermore, the AW2425 Outdoor collection includes updates to our popular and classic series, Hiker and Pallas.

064-0633 HIKER W DX 3L VENTILATED JACKET

B57

P99

The Hiker series DrymaxX® Nano 3Layer jacket from Halti is a masterpiece of years of product development and a trusted companion for every outdoor excursion. Thanks to our DrymaxX® membrane structure, Hiker is a high-quality and breathable shell jacket that meets the technical requirements of even the most demanding outdoorsmen. The timeless and straightforward design is inspired by classic Halti, both in functionality and comfort. The innovative DrymaxX® Nano membrane structure is waterproof and windproof – yet at the same time exceptionally breathable. Whether it's going for a trek, a walk in the woods, or an active hike, this garment is comfortable to move around in. With this lightweight but extremely reliable jacket, you can walk in nature for longer periods of time, even if the weather conditions vary. The design of the Hiker DX 3L also focuses on optimal adjustment. The underarms and sides have two-way zippers that can be easily opened. The hood, cuffs and hem are equally easy to adjust. The pockets are positioned so that they can be easily accessed, even when wearing a backpack. In addition, the Ripstop reinforcements on the back and on the arms are very resistant to abrasion. The Hiker series is one of Halti's most beloved classics. Its product development has reached its peak over thousands of walked kilometers and years. As you move around in this versatile, strong-surfaced jacket, you'll notice that we've thought of everything, as it is designed together with outdoor experts. Every detail has meaning. Combine the jacket with the Hiker DX 3L pants and enjoy the features of a high-tech outfit to the fullest. By adjusting the base and middle layers, you can wear this jacket outdoors in any weather.

B58

D48

D77

The Hiker Polar fleece material is dense, thick and windproof, making it a great choice for both cool spring and early fall. Made from a comfortable teddy fleece, this jacket is a great choice for camping and leisure. The appearance and technical materials of the Hiker Polar fleece make it a great intermediate layer under a jacket and as it is. The soft fleece material is airy and warm. The Hiker fleece is short in length and features a high collar and a zippered chest pocket. The well-fitting cut makes sure that the cold does not creep in from the cuffs or hem.

064-0813 PALLAS M EVO BRUSHED X-STRETCH JACKET

D36

D47

E47

P99

EVO products were born as a result of evolution, when we set out to develop the popular Pallas styles to meet today's needs of the consumers. Pallas Evo brushed jacket has all needed details for day hiking or other active use in your daily life. Straight fit, sleek look with tonal color blockings makes style proper for street to trails. Jacket material is dense and brushed with backside to bring more comfort and warmth. It has also good breathability and exceptional freedom of movement because of highly stretchable, partly recycled X-stretch material. Material surface is finished with Rudolph Bio Logic, 45% plant based DWR treatment that is also PFC free.

064-0635 **HIKER M DX 3L VENTILATED JACKET**

B57

P99

The Hiker series DrymaxX® Nano 3L jacket from Halti is a masterpiece of years of product development and a trusted companion for every outdoor excursion. Thanks to our DrymaxX® membrane structure, Hiker is a high-quality and breathable shell jacket that meets the technical requirements of even the most demanding outdoorsmen. The timeless and straightforward design is inspired by classic Halti, both in functionality and comfort. The innovative DrymaxX® Nano membrane structure is waterproof and windproof – yet at the same time exceptionally breathable. Whether it's going for a trek, a walk in the woods, or an active hike, this garment is comfortable to move around in. With this lightweight but extremely reliable jacket, you can walk in nature for longer periods of time, even if the weather conditions vary. The design of the Hiker DX 3L also focuses on optimal adjustment. The underarms and sides have two-way zippers that can be easily opened. The hood, cuffs and hem are equally easy to adjust. The pockets are positioned so that they can be easily accessed, even when wearing a backpack. In addition, the Ripstop reinforcements on the back and on the arms are very resistant to abrasion. The Hiker series is one of Halti's most beloved classics. Its product development has reached its peak over thousands of walked kilometers and years. As you move around in this versatile, strong-surfaced jacket, you'll notice that we've thought of everything, as it is designed together with outdoor experts. Every detail has meaning. Combine the jacket with the Hiker DX 3L pants and enjoy the features of a high-tech outfit to the fullest. By adjusting the base and middle layers, you can wear this jacket outdoors in any weather.

B58

D48

D77

The Hiker Polar fleece material is dense, thick and windproof, making it a great choice for both cool spring and early fall. Made from a comfortable teddy fleece, this jacket is a great choice for camping and leisure. The appearance and technical materials of the Hiker Polar fleece make it a great intermediate layer under a jacket and as it is. The soft fleece material is airy and warm. The Hiker fleece is short in length and features a high collar and a zippered chest pocket. The well-fitting cut ensures that the cold does not creep in from the cuffs or hem.

At Halti, we have decades of experience in the ruthless arctic weather. Our roots are in the northern climate and its stark extremes. However, the urban laws of nature can be just as fierce as the outdoor wilderness. That's why we created Kallio® - a Nordic urban line with premium functionality and minimalistic elegance. Kallio® brings Halti's frontrunning design into the urban scenery with passion, style and ease. We want you to go out into the world feeling unbeatable - especially when there's a chance of rain and horizontal wind. The AW2425 Kallio® collection features the continuing, winning pieces but also presents new innovative styles and super stylish color palette.

A04

A38

E76

P99

Synkas W 3-in-1 jacket is comprised of an outer water- and windproof and an insulated inner jacket. The outer layer is made from DrymaxX® fabric and loaded with features as taped seams, ventilation, zipper side slits, pockets and hood inside protective collar. Worn alone it offers weather protection and relaxed fitted ease in milder weather. The Microtherm® insulated inner jacket has unique geometric quilting and two zipper pockets. Worn alone it is a feminine quilted jacket, great on dry, chilly days. Attached together jackets create an unbeatable combination to tackle windy, wet and cold conditions. Unpredictable weather happens. Synkas 3-in-1 monomaterial jacket adapts.

065-0425 BERGGA W WARM DX PARKA

A04

A38

E76

P99

Meet Bergga, the ultimate urban parka – not only gorgeous but also gorgeously practical. Bergga is a thrilling combination of cutting-edge design and Halti's premium technical features. The sleek silhouette and clever cuts maximise the urban freedom of movement. Look great and feel invincible in your everyday city life. Whatever the winter sky throws at you, the Bergga jacket will keep you completely dry, sheltered, and warm. Leave your bags at home, there's plenty of room in the pockets. Step into the department store, public transport, or car, and just open the external layer of the double front. To make sure you won't go unnoticed in the late city nights, Bergga is finessed with stylish black reflective details. Our unique inner 3D air-flow channel construction delivers airy warmth. Our signature DrymaxX® fabric, taped seams, and double storm front make you unbeatable – even against the roughest sea wind. If you're one of those tough ones biking through all winter, we salute you with the long side zippers. Bergga is a functional, waterproof, and windproof city parka, but don't let the sophisticated urban look fool you. Wear it for a weekend hike, and you'll discover that it's a high performing wilderness garment too. Model: 175 cm and is wearing size 38 Bergga is made of recycled polyester and is one of Halti's monomaterial pieces. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easier to recycle back to raw material. In other words, choosing monomaterial makes the recycling process more efficient resulting in premium quality recycled yarn – and therefore reduces the use of virgin materials.

065-0461 **PENGER W PUFFER COAT**

A38

D64

P99

The Penger winter jacket – the perfect combination when you don't want to compromise on style and functionality. Say goodbye to sacrificing style for the sake of warmth, as this jacket is designed to feel as comfortable as a down blanket. The long length and slits with snap fasteners offer an unbeatable combination of coverage and mobility, perfect for any occasion. The Microtherm® THERMOFILL wadding in combination with the soft DrymaxX® fabric keeps you warm and protected from biting winter winds. The Microtherm® THERMOFILL provides the ultimate in fluff, warmth and breathability. The DrymaxX® fabric keeps rain and cold away, making it ideal for walking to work, the gym or around the city. The stylish look, subtle branding and black minimalist reflective details complete the jacket you can wear in any situation. When you enter a department store or public transport, you can unzip the top of the double zipper. This feature also makes Penger a favorite among drivers. With the Penger winter jacket, you can enjoy a combination of style and functionality. The Penger jacket is made of recycled polyester and is one of Halti's monomaterial products. Monomaterial means a product consisting of a single material or fiber. The use of monomaterial means that it is easier to recycle the garment back into a raw material, as it does not need to be separated from other fibers. In other words, choosing monomaterial makes the recycling process more efficient, resulting in first-class recycled thread – and thus reducing the use of virgin materials.

A04

A38

E76

P99

Tokoi is a sleek, waterproof, and windproof unisex parka that literally has it all. Being Halti's longest jacket, Tokoi is designed for ultimate coverage and outstanding mobility. A perfect fit for the office, city bike rides, after works, you name it. In this fabulously versatile shell coat, Halti's stunning outdoor features are brought to urban conditions. On your way to a business meeting on a bad weather day, just wear Tokoi and you can forget your umbrella. Thanks to our signature Halti DrymaxX® fabric, you'll navigate long, rainy city days completely warm and dry. Long side zippers allow easy access to the pockets of your jeans. They make a big difference, adding extra room for movement – you'll notice it every time when biking and hopping on and off public transport. Add an extra layer underneath and you'll go far into the autumn. Tokoi is a high-performing, simple parka for complex city life. That said, it's just as great for weekend hikes in the woods. With Tokoi, you'll always feel smart and well prepared. Especially when there's a chance of wind or horizontal rain – or both. To make sure you won't go unnoticed in the late city nights, Tokoi is finessed with stylish black reflective details. Tokoi is made of recycled polyester and is one of Halti's monomaterial pieces. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easier to recycle back to raw material. 065-0500 SYNKAS M 3-IN-1 DX JACKET

A38

B56

P99

Synkas M 3-in-1 jacket is comprised of an outer water- and windproof and an insulated inner jacket. The outer layer is made from DrymaxX® fabric and loaded with features as taped seams, ventilation, zipper side slits, pockets and hood inside protective collar. Worn alone it offers weather protection and relaxed fitted ease in milder weather. The Microtherm® insulated inner jacket has unique geometric quilting and two zipper pockets. Worn alone it is a smart quilted jacket, great on dry, chilly days. Attached together jackets create an unbeatable combination to tackle windy, wet and cold conditions. Unpredictable weather happens. Synkas 3-in-1 monomaterial jacket adapts.

065-0426 BERGGA M WARM DX PARKA

A04

A38

B56

P99

Meet Bergga, the ultimate urban parka – not only gorgeous but also gorgeously practical. Bergga is a thrilling combination of cutting-edge design and Halti's premium technical features. The sleek silhouette and clever cuts maximise the urban freedom of movement. Look great and feel invincible in your everyday city life. Whatever the winter sky throws at you, the Bergga jacket will keep you completely dry, sheltered, and warm. Leave your bags at home, there's plenty of room in the pockets. Step into the department store, public transport, or car, and just open the external layer of the double front. To make sure you won't go unnoticed in the late city nights, Bergga is finessed with stylish black reflective details. Our unique inner 3D air-flow channel construction delivers airy warmth. Our signature DrymaxX® fabric, taped seams, and double storm front make you unbeatable – even against the roughest sea wind. If you're one of those tough ones biking through all winter, we salute you with the long side zippers. Bergga is a functional, waterproof, and windproof city parka, but don't let the sophisticated urban look fool you. Wear it for a weekend hike, and you'll discover that it's a high performing wilderness garment too. Bergga is made of recycled polyester and is one of Halti's monomaterial pieces. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easy to return to raw material – and therefore reduces the use of virgin materials. In other words, choosing monomaterial makes the recycling process much simpler as it cuts down the amount of energy required to separate various materials.

065-0468 **PENGER M PUFFER COAT**

A38

P99

The Penger winter jacket – the perfect combination when you don't want to compromise on style and functionality. Say goodbye to sacrificing style for the sake of warmth, as this jacket is designed to feel as comfortable as a down blanket. The long length and slits with snap fasteners offer an unbeatable combination of coverage and mobility, perfect for any occasion. The Microtherm® THERMOFILL wadding in combination with the soft DrymaxX® fabric keeps you warm and protected from biting winter winds. The Microtherm® THERMOFILL provides the ultimate in fluff, warmth and breathability. The DrymaxX® fabric keeps rain and cold away, making it ideal for walking to work, the gym or around the city. The stylish look, subtle branding and black minimalist reflective details complete the jacket you can wear in any situation. When you enter a department store or public transport, you can unzip the top of the double zipper. This feature also makes Penger a favorite among drivers. With the Penger winter jacket, you can enjoy a combination of style and functionality. The Penger jacket is made of recycled polyester and is one of Halti's monomaterial products. Monomaterial means a product consisting of a single material or fiber. The use of monomaterial means that it is easier to recycle the garment back into a raw material, as it does not need to be separated from other fibers. In other words, choosing monomaterial makes the recycling process more efficient, resulting in first-class recycled thread – and thus reducing the use of virgin materials.

065-0469 **PENGER M PUFFER VEST**

P99

The perfect combination of comfort and style without compromising on functionality. This versatile vest is designed to keep you warm, feel as comfortable as a down blanket, and exude both warmth and attitude. This gorgeous, windproof and functional puffer vest is perfect for any occasion. Use it as a warming layer on top of your shell jacket when you go to work, the gym or for a walk in the city. The long length and slits with snap fasteners offer an unbeatable combination of coverage and mobility. The DrymaxX® fabric keeps light rain out, making it ideal for use in the autumn. The stylish look, subtle branding and black minimalist reflective details complete the Penger vest. When you enter a department store or public transport, you can unzip the top of the double zipper. This feature also makes the Penger vest a favorite of drivers. The Penger vest is made of recycled polyester and is one of Halti's monomaterial products. 065-0419 LINJAT M PUFFER PARKA

A38

B56

P99

The Linjat puffer parka combines class and Halti's premium functionality without a single compromise. Gorgeous, windproof, and functional, the Linjat jacket adapts to different situations with ease and style. It keeps you warm on your way to work, the gym, and on a city stroll, besides being also an impeccable fit for after works and Saturday nights. Our signature DrymaxX® fabric, hood and inner rib knit cuffs keep cold and light rain out. Microtherm® THERMOFILL insulation makes the puffer extremely fluffy and warm yet breathable. The sleek look, subtle branding and black minimalistic reflective details result in a classic puffer you'll find yourself wearing on any occasion. This is made of slightly crunchy and textured material, that looks just as great when thrown over a suit jacket. Linjat is made of recycled polyester and is one of Halti's monomaterial pieces. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easier to recycle back to raw material. In other words, choosing monomaterial makes the recycling process more efficient resulting in premium quality recycled yarn – and therefore reduces the use of virgin materials.

065-0422 TOKOI M DX PARKA

A04

A38

B56

P99

Tokoi is a sleek, waterproof, and windproof unisex parka that literally has it all. Being Halti's longest jacket, Tokoi is designed for ultimate coverage and outstanding mobility. A perfect fit for the office, city bike rides, after works, you name it. In this fabulously versatile shell coat, Halti's stunning outdoor features are brought to urban conditions. On your way to a business meeting on a bad weather day, just wear Tokoi and you can forget your umbrella. Thanks to our signature Halti DrymaxX® fabric, you'll navigate long, rainy city days completely warm and dry. Long side zippers allow easy access to the pockets of your jeans. They make a big difference, adding extra room for movement – you'll notice it every time when biking and hopping on and off public transport. Add an extra layer underneath and you'll go far into the autumn. Tokoi is a high-performing, simple parka for complex city life. That said, it's just as great for weekend hikes in the woods. With Tokoi, you'll always feel smart and well prepared. Especially when there's a chance of wind or horizontal rain – or both. To make sure you won't go unnoticed in the late city nights, Tokoi is finessed with stylish black reflective details. Tokoi is made of recycled polyester and is one of Halti's monomaterial pieces. Monomaterial refers to a product composed of a single material or fibre. Monomaterial design means that the garment is easier to recycle back to raw material. In other words, choosing monomaterial makes the recycling process more efficient resulting in premium quality recycled yarn – and therefore reduces the use of virgin materials.

059-2629 ADRENALINE W STRETCH LITE PANTS

B66

E53

P99

The Adrenaline Lite pants are a lighter version of the popular Adrenaline pants. Adrenaline Lite is designed for active skiers and is also ideal for long ski trips and other active winter sports. The pants are made of X-stretch softshell material, which is wind and moisture resistant and highly breathable. The softly brushed inner surface is comfortable against the skin and brings warmth in colder weather. Zippered vents are positioned on the thighs, allowing you to conveniently control the air flow. The pants have a zipper at the bottom of the legs with a gusset underneath, giving the pants a bit of slack. This also makes it easier to put the pants on. The pants also have a strong Cordura ripstop material added to their cuffs, which is extremely durable.

MATERIAL:

X-stretch brushed
47% Recycled polyester / 45% Polyamide / 8% Elastane
Rough Active Ripstop

059-2575 ALPINE UNISEX 3L DX JACKET

C36

C41

The Alpine unisex shell jacket is designed for demanding skiers. The jacket is lightweight and fits in small spaces, and is designed to be worn during backcountry skiing. This jacket has a well-fitting design that takes into account the wide range of motion of cross-country and downhill skiers. The jacket can be worn over an intermediate layer or packed in a backpack, as the product can be packed in its own hood. The pockets in the jacket are designed to allow you to carry a backpack, so access to the pockets is never blocked. The chest pocket of the jacket is designed for holding a phone, with Primaloft Aerogel® thermal insulation to prevent the phone from running out of battery in cold conditions. The jacket is made with DrymaxX® Nano Grid Ripstop membrane material, which is highly breathable and completely waterproof and windproof. The jacket effectively transfers moisture outwards and keeps you comfortable during intense exercise. The jacket has ventilation holes under the arms to maximize air flow in warmer conditions. The jacket is a part of our ECO collection, as it is made using recycled material and without fluorine compounds (PFC-free). Pair with the Alpine pants.

MATERIAL:

DrymaxX® Nano Grid Ripstop
waterproofness: 20000 mm, breathability: 40000 g/m²/24h

SKIWEAR

Halti's Skiwear is legendary. Our piece has won the ISPO award back in 2021. Our skiwear has been used and promoted by the legendary Finnish alpine skiing stars like Kalle Palander and Tanja Poutiainen over the years. The expeditioners of the three poles have trusted our collection. So, we don't just design skiwear, we craft legends. The FW2425 brings in an eye-catching mix of high-tech products, bold patterns, and timeless styles. The collection is 100% recycled, 68% Bluesign® approved and has a new bio-based material in its DWR treatments.

Halti's Insulations collection comprises RDS down products, PrimaLoft® insulations, and Microtherm® insulations. In our down products, we exclusively use certified Responsible Down Standard material. Our Microtherm® material is 100% recycled and vegan, while our PrimaLoft® Silver Utility synthetic insulation contains 85% recycled material and is also entirely vegan. The AW2425 collection features a blend of trusted classics and intriguing new additions.

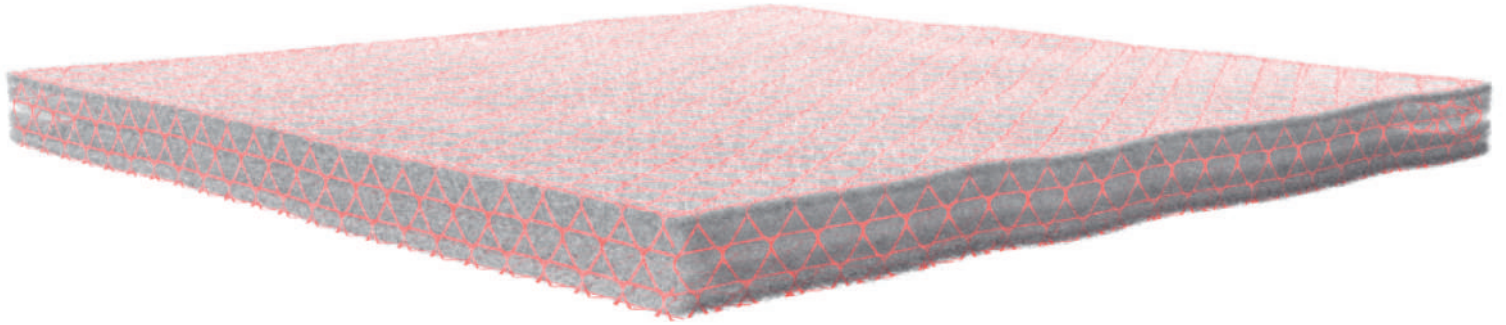

SUSTAINABILITY KPI'S FOR INSULATION CATEGORY		
100%	100%	40%
		
Think Ahead	Recycled/partly recycled materials	Bluesign shell materials

UTILITY

A new definition of durability.

Easy Laundering

Wash and dry at any temperature

Design Freedom

No quilting requirements & pair with any fabric

Easy on the Earth

Recycled content, efficient manufacturing, design freedom & long lasting

Maintains Thermal Values

Unique structure upholds original levels of warmth (even after wear and tear)

Resilient & Compression Resistant

Bounces back after repeated motion & extended compression

Abrasion Resistant

Can be paired with any fabric & stands up to abrasion with little-to-no fiber migration

From the Lab.

Thermal Performance

85% Up to 85% dry thermal value remains after extreme testing. *Tested according to ISO 11092.

Thickness Retention

92% Up to 92% thickness remains after extreme testing. *Tested according to PrimaLoft internal test method.

Resilience & Compression Resistance

77% Up to 77% of original thickness rebounds after extreme testing. *Test Method: ASTM D6571-01 Determination of Compression Resistance and Recovery.

Abrasion Resistance

100% Passed fiber migration testing with 100% of sample fabrics (ranging from 71 cfm - 142 cfm). *Tested according to PrimaLoft internal test method.

P99

The Planker women's shirt is designed to offer you the best possible comfort and warmth for both intense and relaxed activities. The soft material feels super comfortable against the skin, and the wide, high collar with a soft fleece lining adds warmth. Can it get any cozier than this? Planker is both stylish and functional. The shirt is longer in the back, with long sleeves, thumbholes, and a roomy collar offering a great fit and a distinctive look. Planker works excellently as an intermediate layer under a ski or shell jacket, or it can be used as is for warming up, after-ski, or in your free time.

BASELAYERS

Halti's Baselayers collection is divided into two categories: Intense and Comfort. Intense technical baselayers cater for active use and high intensity training, keeping the wearer cool and dry. High-functional Active Dry materials with ergonomic fit and smooth details support optimal performance. Comfort technical baselayers is a functional crossover collection providing warmth and body temperature management for colder conditions and lower pulse workouts. Baselayers with generic outlook are made of super comfortable pure and mixed natural materials. Layering up is the key, and Halti's baselayers play a vital role in it.

088-0199 PIHKA M II SHIRT

E47

P99

The Pihka II is a lightweight and soft men's merino wool undershirt that is suitable for many different uses. The merino shirt is comfortable to wear, as it does not rub or chafe. The shirt has a thin merino wool knit with an excellent warming ability – it is always dry and warm against the skin, and is able to keep its warmth even when wet. Merino wool is naturally antibacterial, so it is suitable for use all year round, from hiking to skiing. Halti's mulesing-free merino wool product is an ethical choice. Combine the shirt with the Pihka merino wool pants.
